2. With regard to the **elements*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):*

Description, Pages

1-50 as originally filed

Claims, Numbers

1-11 as originally filed

- ☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing
3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):

* If item 4 applies, some or all of these sheets may be marked "superseded."

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/EP2004/014262

The documents mentioned hereinafter are numbered in accordance with the order in which they appear in the search report.

The present invention relates to the plant growth regulating effect of compounds of general formula (I). D1-D4 relate to such compounds for medical use. The prior art does neither describe nor suggest any activity on plants. D5 describes plant growth regulators of the aminothiazole type. However, these compounds bear 3 different substituents on 3 different sites. It could not be expected that a growth regulating activity for plants could be kept while making these changes. Therefore, this aspect of the present invention, the use of these compounds, is considered to fulfill the criteria of Art.33 PCT.

However, the present claim 6 is anticipated by D1-D4 (Art.33(2) PCT). This claim 6 relates to compositions containing the compounds of general formula (I). In the light of the prior art, such compositions were available to the public at the relevant date.

The fact that the claimed compositions are intended to be used on plants rather than for therapy is not a technical feature in a claim directed to a composition. Such a "feature" could only have some relevance in the case it would imply that the prior art compositions cannot be used for this claimed purpose. Although one skilled in the art could not have used some of these compositions for economical/practical reasons, the use of these compositions is believed to yield the desired effect. Therefore, the mention of the technical field is not considered as distinguishing.
